

Release Notes – 24 July 2026

Enhancements & Improvements

1. BRE Enhancements

- ABB Surrogate results are now visible along with all other BRE results in **View Logs** and **JSON BRE Logs**.
- ABB Surrogate policy now also executes at **CF Approved** stage.
- ABB Surrogate offer changes will only update the **eligible amount in comments** without modifying the selected plan.
- Improved handling of **NTC (Thin File)** cases to avoid unnecessary *"No data found"* bureau errors.
- Table of Offer enhanced for **Bureau Surrogate Tradeline** scenarios.
- Added validations for minimum (**₹50K**) and maximum (**₹5L**) eligible net loan amounts.
- JSON BRE Logs now display the **highest eligible Net Loan Amount** and **EMI Limit** across all passed policies.
- Table of Offer now runs for all successful BRE policies and automatically selects the highest eligible amount.

2. UCIC Integration

- Integrated UCIC API with the application workflow.

3. Bureau Report Updates

- Added support for **BlackSoil Capital Private Limited**.
- Updated bureau report filters to include additional eligible cases.

4. Insurance Calculation Update

- Insurance Premium and CF Value Added Service Fee are now calculated using **Gross Project Amount** instead of **Loan Amount**.
- Applicable for new approved cases (post-release) across KMGC and BlackSoil.
- Updated calculations reflected across reports, payment flow, and customer documents (KFS, CAM, Sanction Letter, Welcome Letter, SOA, Invoice, etc.).
- Gross Project Amount can be modified up to **Approved** stage, with automatic insurance recalculation.
- Existing approved cases remain unaffected.
